SOFT SKILLS

Teamwork · Problem solving · Report writing · Presenting

Zwe Pyae Sone

AI Engineer · AI Automation · Web Developer

Computer Science student specialising in Artificial Intelligence at Asia Pacific University. I enjoy turning messy real-world problems into clean, working systems — from AI sales assistants and automations to full-stack web apps and well-normalised databases. Open to internships.

EDUCATION

BSc (Hons) Computer Science — Artificial Intelligence — Currently studying

Asia Pacific University of Technology & Innovation (APU), Kuala Lumpur

Modules: Database Management Systems, Computer Networking, Operating Systems, AI Training.

GED — General Educational Development — Completed

IGCSE — Completed

PROJECTS

ClueX — AI Sales Assistant for Messenger — Solo

n8n automation for an online clothing shop's Facebook Page. The AI agent replies in Burmese, shows product photos, collects orders, and forwards receipts to the owner on Telegram while logging every order to Google Sheets.

n8n · AI Agent · Claude API · Meta Graph API · Webhooks · Google Sheets · Telegram Bot

Cluex Shop — Myanmar E-commerce Web App — Full-stack

Online store with search and filters, township-based checkout, KBZPay / WavePay receipt upload, instant Telegram order alerts and an admin dashboard with bulk product import. Supabase with row-level security.

React · Vite · Tailwind CSS · Supabase · PostgreSQL · Zustand · Framer Motion

Gold Shop Pawn Desk — Group · UI/UX & developer

Burmese-language pawn management system for a gold shop: weight and purity valuation against the daily gold price, interest renewals as linked vouchers in one SQL transaction, and automatic expiry.

JavaScript · Node.js · Express · SQL Server (T-SQL) · Docker · UI/UX design

ClueX Studio — IT Services Website — My business · Live

Website for my own service business (websites, AI chatbots, ads management, dashboards) with a real-time black-hole WebGL shader hero and one-tap contact.

HTML · CSS · JavaScript · WebGL / GLSL · Canvas API

BlueBites — Food Delivery App — Prototype

Mobile food delivery app for Yangon with cart, promo codes, local payment options and a live order-tracking timeline.

React · JavaScript · Mobile UI · UI/UX design

Personal Portfolio — Solo · Live

Hand-coded portfolio with an interactive canvas background, a 3D skill "magic circle" and project slideshows, deployed on Vercel.

HTML · CSS · JavaScript · Canvas API · SVG · Vercel
